

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS.

	PAGE.
CHAPTER I. MECHANICAL AND GEOMETRICAL NOTIONS.....	13-20
The notion of transportation in general and of speed and economy of force as mechanical tests of its effi- ciency.....	13
Theoretical arrangement of roads under uniform condi- tions.....	13-15
The actual arrangement compared with the theoretical	15-17
Primary analysis of the mechanism of transportation	17-20
CHAPTER II. THE RELATION OF LAND TRANSPORTATION TO PHYSICAL CONDITIONS.....	20-30
Classification of obstacles and facilities to movement by land.....	20, 21
Physical conditions determine the development of the way.....	21-24
Analysis of the development of land transportation with reference to the use of natural forces.....	24-30
CHAPTER III. WATER CARRIAGE AS RELATED TO PHYSICAL CONDITIONS.....	30-35
Classification of obstacles and facilities to movement by water.....	30-32
Analysis of the development of water transportation with reference to natural conditions.....	32-35
CHAPTER IV. GENERAL OBSERVATIONS ON THE RELATION OF TRANSPORTATION TO NATURAL CONDITIONS.....	35-40
Survival of primitive methods.....	36, 37
Permanent differences in the character of land and water transportation.....	37, 38
Their relative historical importance.....	38-40
CHAPTER V. TRANSPORTATION AND ORGANIZED SOCIETY— GENERAL.....	40-45
The need of transportation underlies all social institu- tions.....	40-42

General statement of the social function of transportation.....	42, 43
The tests of its efficiency change with social progress..	43, 44
The classification of institutions here used.....	44, 45
CHAPTER VI. TRANSPORTATION AND MILITARY ORGANIZATION.....	45-53
The military character of early transportation.....	45, 46
Military transportation as a distinct type.....	46-51
The influence of military transportation upon economic,	51-53
CHAPTER VII. TRANSPORTATION AND POLITICAL ORGANIZATION.....	53-62
Political transportation as a distinct type.....	53-56
Transportation as limited or modified by political boundaries.....	56-59
The relation of transportation to government.....	59-62
The theory of political control under modern conditions reserved to a final chapter.....	62
CHAPTER VIII. THE RELATION OF TRANSPORTATION TO ORGANIZATION HAVING AN IDEAL PURPOSE.....	62-72
Examples of the kind of organization meant.....	62, 63
The relation of transportation to early religious organization.....	63-65
The pilgrimage a distinct type of transportation.....	65-66
Complex development of ideal organization in modern times.....	66-69
The relation of transportation to communication.....	69-72
CHAPTER IX. TRANSPORTATION AND ECONOMIC ORGANIZATION.....	72-90
Two-fold character of the subject.....	72, 73
Equivalent to the study of economic society in its place relations.....	73
The class of questions arising and general plan of procedure.....	73, 74
The relation of transportation to industrial concentration and the territorial division of labor—general....	74-77
The two fundamental causes of place-specialization in industry.....	77, 78
1. The inherent economy of division of labor.	
2. The existence of local facilities for production.	
Analysis of the working of the first cause and of its relation to transportation.....	78-83

Analysis of the working of the second cause and of its relation to transportation.....	83-89
The general relation between transportation and commercial exchange.....	89, 90
CHAPTER X. THE LOCATION OF TOWNS AND CITIES.....	90-100
Non-economic causes of the location of cities.....	90, 91
Population and wealth tend to collect at a break in transportation.....	91, 92
A mechanical break and its effects.....	92
A commercial break and how it makes a city.....	92, 93
Physical interruptions as causes of breaks and hence of cities.....	93-97
Breaks due to the juncture of small and scattered movements with a large and unified movement.....	97, 98
Breaks due to political conditions.....	98
Summary of the theory of urban location.....	99, 100
CHAPTER XI. THE RELATION OF TRANSPORTATION TO MARKETS, PRICES, COMPETITION, ETC.....	100-105
Efficient transportation frees economic forces.....	100, 101
Extends and unifies demand and supply.....	101-103
Transportation and communication determine the area of markets.....	103, 104
Relation of transportation to prices.....	104, 105
CHAPTER XII. THE GENERAL THEORY OF RATES.....	105-123
Relation between the public and private theories of rates.....	106, 107
Four principles of the theory of rates advanced.....	107, 108
1. Justice among persons.	
2. Utilization of special facilities arising from immovable natural agents.	
3. Rates should favor the diffusion rather than the concentration of manufacturing and commercial industries.	
4. In other respects they should give the greatest possible freedom to the action of economic forces	
The first principle.....	108, 109
The second principle and its bearing on rates.....	109-112
The third principle.....	112-115
The fourth principle.....	115
How rates should be adjusted to conform to the greatest freedom principle.....	116-118

Reasons for modifying this principle by the decentralizing principle.....	118-120
Restatement of the considerations governing rates under the theory proposed.....	121
These constitute an adequate general theory of rates...	121, 122
Chief difficulties in the application of any principle...	122, 123
CHAPTER XIII. TRANSPORTATION AND RENT.....	123-128
The relation of transportation to rent—general.....	123, 124
The theory of the relation of transportation to agricultural and city rents.....	124-128
CHAPTER XIV. THE POLITICAL RELATIONS OF TRANSPORTATION FURTHER CONSIDERED.....	128-148
Two chief divisions of the subject as here treated.....	129
1. Transportation as a highly organic activity must be carried on by agencies of a like degree of organization.	
2. The expedient division of transportation functions between the state and private associations.	
The organic character of transportation and its consequences discussed and illustrated.....	130-136
Advantages and disadvantages of private associations and of the state in the conduct of any enterprise....	136-139
Application of the general conclusion to transportation	139-141
The aims of public control.	
Publicity.....	141-143
Two-fold aim of positive control; to further better organization and to control the end of organization.....	143-146
Public control must rest on some general theory of rates.....	146-148
